

Unlike certain organic compounds of silver, the colloidal metal is NOT organotropic. This means it will not turn or change in response to a stimuli, and does not cause necrosis, or death of living tissue. It can be used indefinitely without staining mucous membranes of the eyes, the inside of the mouth, or elsewhere in or on the body. It has now mostly replaced silver nitrate in useage by ophthamologists for the cleansing and disinfecting of the eyes.

Other reports in the Journal from the same time period gave these benefits for the useage of Colloidal Silver:

- ◆ Subduing inflammation and promoting healing.**
- ◆ Prostate, reducing enlargement.**
- ◆ Ani pruritis, perineal eczema, hemmorhoidal problems, all eliminated.**
- ◆ Bowel disorders, if caused by bacteria, rapidly eliminated.**
- ◆ Warts, rapid disappearance.**
- ◆ Eustachian tubes, and nasopharyngeal areas, restores potency of and eliminates cattarh.**
- ◆ Tonsillitis, quinsies, and other septic conditions of the mouth and throat, including Whooping Cough and other persistant coughs, all are rapidly eliminated.**
- ◆ Ear aches and other problems, again rapidly healed.**
- ◆ Shingles, reduces pain and promotes rapid healing.**
- ◆ Feet, itching, scaling, (Athlete's Foot and fungi problems) all healed.**

Some time ago it was discovered in Australia that stomach ulcers were caused by bacteria, and the news of treatment by colloidal silver was widely publicized. Yet it was not until recently that some doctors in this country began the same course of treatment... and many of them are still not aware of it.

Colloidal Silver has broken the barrier of the possible negative side effects of the larger silver particles, making it a most effective bacteria and virus fighter.
